ABOUT US

Shandong Care Safe Labor Protect Products Co.,Ltd is a medium-sized factory that produces and develops gloves in Jiangsu province. Our main advantage product is -- Dipping Gloves. We know that every hardworking user uses their hands to provide a better life for their families. At the same time, they put forward more and higher requirements for the quality of labor protection products. Therefore, we are committed to finding and developing new materials that are more environmentally friendly and economical. For labor protection products, every user who uses our products gets more protection and is more comfortable to wear. For example, we have developed an additive that can be added to the latex of a dipping glove to leave the glove with no odor on the hand during using. When you have finished your day's work, you can safely embrace your lover and touch your lovely child.

Why are we different from others?

Honesty is our most basic commitment to our customers and the noble character we have always adhered to.

There is an undisclosed secret in the glove industry - no factory can produce all kinds of gloves. The suppliers we choose to outsource production have undergone many strict inspections and have a good reputation in the industry. For all outsourced production orders, we have a dedicated person who is responsible for product quality monitoring before, during and after production. Once we find a problem, we will communicate with the customer and make improvements or stop in time.

Efficient - is the most basic requirement for our company to work every day.

In cooperation with the technical engineer with 25 years of glove production and management, the salesperson will reply to the customer within 10 minutes after receiving the customer's inquiry, and report the accurate price to the customer within 8 hours, and send the sample within 3 days.

We will use a hundred times of hard work in exchange for your satisfaction.
